

Built like a brick video cabinet

During the June 14 Board Meeting, there was discussion of what to do with the Audio-Video cabinet, which is showing its age, and which needs to be removed at least temporarily to allow access to that corner of the clubhouse. This led to ideas on how to build a new one, and somebody suggested it be built of something more durable than wood... like bricks. Karl suggested that we put a device inside which occasionally plays back a recording that says, "For the love of God, Montessor."
